

INFORMATION SYSTEMS SECURITY GROUP  
MONTHLY HIGHLIGHTS

December 1977

SPECIAL ACTIVITIES:

STATINTL

1. ADP Risk Assessment

Four representatives of Information Systems Security Group conferred with two Computer Resource Control contractors at [REDACTED] on 1 and 2 December and discussed the preliminary findings of the Risk Analysis Study and prepared a status summary.

2. CRAFT (Clandestine Record Automated Field Terminal)

Information Services Staff, DDO advised ISSG that the DCI has been briefed on the CRAFT Project and the security implications related to this activity.

3. Treaty Organizations

At the request of the CIA Treaty Organization Control Officer, the Central U. S. Registry (Pentagon) officially disestablished the CIA SEATO Subregistry effective 15 December 1977.

TRAINING:

1. Internal

Three individuals in Information Systems Security Group attended a one-day course dealing with Data Base Concepts sponsored by the Office of Data Processing.

2. External

All professional personnel in Information Systems Security Group attended two one-half day tutorials sponsored by IBM. The tutorials covered a briefing on the IBM's Data Encryption Standard Algorithm and the multiple operating systems associated with the 360 and 370 IBM Computer Systems.

**Administrative - Internal Use Only**

**Approved For Release 2000/05/31 : CIA-RDP83B00823R000600090058-0**

GENERAL:

1. Information Systems Security Group granted twenty-two security approvals for the installation and/or relocation of ADP remote terminal devices and/or related peripheral equipment.

2. Information Systems Security Group requested that OC/Communications Security Staff conduct [REDACTED] tests at various contractor locations utilizing computers or word processing equipment to process Agency data.
